

ASCO™ valves achieved the customer's technical specifications and performance goals

RESULTS

- Reduced time to market for UL certified valves, developed and tested by Emerson
- Achieved customer technical specifications and performance goals
- Continued support as a trusted adviser in development of suppression systems

APPLICATION

Automatic Sprinkler System

CHALLENGE

An automatic sprinkler manufacturer was developing the next generation deluge system and was seeking a solenoid valve supplier to help them achieve their technical requirements. The customer wanted solenoid valves that could be used on a variety of systems, while also certifying these valves to new approvals.

SOLUTION

The ASCO™ Series 210 valves are rugged and reliable valves that are also flexible enough to pilot most deluge sprinkler systems. The customer utilizes ASCO valves on most of its piloted automatic sprinkler systems and continues to partner with Emerson to bring new and improved products to market.

The customer utilized the ASCO™ Series 210 valves on most of its piloted automatic sprinkler systems. They continue to partner with Emerson in the development of suppression systems.
