Measurement Instrumentation Training

Enhanced Skills Through Training

Emerson offers online, on-site, and hands-on training for Rosemount™, Micro Motion™, and more Emerson products. Empower your workforce by learning about new technologies and refining critical skill sets to maximize performance.

When your employees participate in our certified courses, they will gain valuable knowledge of cutting-edge technologies and best practices. You can be confident your staff has the expertise to efficiently install, configure, calibrate, and maintain your instrumentation, so they can detect and troubleshoot plant performance issues early. With your own experts on staff, you'll be able to achieve greater performance and cost efficiencies to help you extend the lifecycle of your plant.

Our full-time, factory-certified Emerson service instructors share their unsurpassed knowledge and expertise of instrumentation and processes. Learn from the best in the industry in a format that works for you. We offer online, on-site, and hands-on learning options. Additionally, we can customize training programs to suit your specialized needs.

Solutions to Solve Your Challenges

Emerson Lifecycle Services provides customers with the expertise, technology, and processes to help them operate safely, improve asset reliability, and optimize process capabilities. Our global network of sales offices, technical support, and accredited service centers ensure Measurement services and solutions are available for our customers.

TRAINING SERVICES

Training to Fit Your Needs

Our service technicians are factory trained and certified on Emerson products. They adhere to standard operating procedure protocols, which ensure consistent support and service outcomes. This enables them to provide accurate and reliable process measurement products in any application, process, or plant, every time.

Online, eLearning or Virtual Instructor-led

- Train on your schedule through eLearning modules and Virtual Instructor-led training courses.
- Convenient training schedules provide flexibility.
- Practice troubleshooting techniques with benign oil and water processes.

On-site, at an Emerson office or your facility

- Students will learn through hands-on experiences, addressing both practical and theoretical scenarios, using state-of-the-art Rosemount instrumentation.
- Courses feature classroom lecture and hands-on workshops to interact with products

Hands-on, in the Interactive Plant Environment

- Gain hands-on, immersive experience to enhance learning through simulated real-life plant scenarios in a hazard-free environment.
- Immersive training models plant environments, to replicate your most common (and unexpected) process scenarios.
